Summary & Goal

I am an ambitious software developer with good programming skills and sufficient theoretical knowledge. During the last year, I have been successfully working on several projects with a total of 300+ users.

I am looking for a job as a junior software developer that will give me an opportunity to apply my skills for solving real-world problems and learn actively from my colleagues in order to constantly improve the quality of my code, thus growing professionally.

Courses & Practice

2019
